

WORLD COURT PROJECT UK

Nuclear weapons do not make us secure. They are about insecurity, doubt and fear.

Most people want to live in a world free from the nuclear threat. This hope has the backing of law:

- ❖ in 1968 the world's governments signed a treaty which promised to abolish these weapons,
- ❖ in 1996 the World Court confirmed that this was a legal obligation,
- ❖ in 2000 the US, Russia, France, China, and the UK pledged to eliminate their nuclear arsenals.

These solemn pledges are not being kept. Negotiations haven't even started. Thousands of nuclear weapons are still ready to be used at a moment's notice.

You can help the law prevail and make the world safer by signing this

Declaration for a Nuclear Weapon-Free World.

All these Declarations will be prominently displayed in New York in 2005 when the world's leaders gather at the United Nations to review their treaty obligations.

Yours can be among them.

The World Court Project is an international citizens' network working to publicise and have implemented the 8 July 1996 Advisory Opinion of the International Court of Justice on the legal status of the threat or use of nuclear weapons.
